Contents Volume 153

1 Editorial: Timetabling and Rostering
E. Burke and S. Petrovic
3 Staff scheduling and rostering: A review of applications, methods and models
A.T. Ernst, H. Jiang, M. Krishnamoorthy and D. Sier
28 A greedy-based neighborhood search approach to a nurse rostering problem
F. Bellanti, G. Carello, F. Della Croce and R. Tadei
41 Iterative restart technique for solving timetabling problems
A. Meisels and E. Kaplansky
51 Local search for shift design
N. Musliu, A. Schaerf and W. Slany
65 A comparison of discrete and continuous neural network approaches to solve the class/teacher timetabling problem
M.P. Carrasco and M.V. Pato
80 Using tabu search with longer-term memory and relaxation to create examination timetables
G.M. White, B.S. Xie and S. Zonjic
92 Global constraints for round robin tournament scheduling
M. Henz, T. Müller and S. Thiel
102 Memetic Algorithm timetabling for non-commercial sport leagues
J. Schönberger, D.C. Mattfeld and H. Kopfer
117 An integer programming formulation for a case study in university timetabling
S. Daskalaki, T. Birbas and E. Housos
136 An automated university course timetabling system developed in a distributed environment: A case study
M. Dimopoulou and P. Miliotis
148 A case study of single shift planning and scheduling under annualized hours: A simple three-step approach
C.S. Azmat and M. Widmer
176 A new model for complete solutions to one-dimensional cutting stock problems
R.E. Johnston and E. Sadinlija
184 Effective algorithm and heuristic for the generalized assignment problem
S. Haddadi and H. Ouzia
191 Weight reduction problems with certain bottleneck objectives
R.E. Burkard, Y. Lin and J. Zhang
200 GRASP and path relinking for the matrix bandwidth minimization
E. Piñana, I. Plana, V. Campos and R. Martí
211 Single machine batch scheduling with jointly compressible setup and processing times
C.T.D. Ng, T.C.E. Cheng and M.Y. Kovalyov

doi:10.1016/S0377-2217(03)00690-8

220 A repairing technique for the local search of the job-shop problem
B. Murovec and P. Šuhel
239 Computing a lower approximation of the compulsory part of a task with varying duration and varying resource consumption
E. Poder, N. Beldiceanu and E. Sanlaville
255 A note on the approximation of the asymmetric traveling salesman problem
G. Righini and M. Trubian
267 Editorial: 12th Mini Euro Conference: Decision support systems; Electronic and mobile commerce; Multicriteria decision aid; Human centered processes; Ethical dilemmas in decision making
J.P. Brans, G. Coppin, Ph. Lenca, T. Jelassi, M. Roubens and P. Zarate
271 Using ELECTRE TRI outranking method to sort MOMILP nondominated solutions
R.P. Lourenço and J.P. Costa
290 Formulating national information technology strategies: A preference ranking model using PROMETHEE method
A. Albadvi
297 A mathematical programming procedure for the choice problematic
H. Chabchoub and J.M. Martel
307 PROMETHEE and AHP: The design of operational synergies in multicriteria analysis. Strengthening PROMETHEE with ideas of AHP
C. Macharis, J. Springael, K. De Brucker and A. Verbeke
318 A note on AHP group consistency for the row geometric mean priorization procedure
M.T. Escobar, J. Aguarón and J.M. Moreno-Jiménez
323 A career choice problem: An example of how to use MACBETH to build a quantitative value model based on qualitative value judgments
C.A. Bana e Costa and M.P. Chagas
332 A public warehouses selection support system
G. Colson and F. Dorigo
350 Multicriteria optimization of an emulsion polymerization process
C. Fonteix, S. Massebeuf, F. Pla and L.N. Kiss
360 Multicriteria optimization of a single-cell oil production
L. Muniglia, L. Nandor Kiss, C. Fonteix and I. Marc
370 A multiple objective model to deal with economy–energy–environment interactions
C. Oliveira and C.H. Antunes
386 The zero-emission certificates: A novel CO_2-pollution reduction instrument applied to the electricity market
P.L. Kunsch, J. Springael and J.-P. Brans
400 Opportunities for OR in intermodal freight transport research: A review
C. Macharis and Y.M. Bontekoning
417 Modeling and predicting emerging inference-based decisions in complex and ambiguous legal settings
C.G. Lundberg
433 Minimally biased weight determination in personnel selection
A. Jessop
445 Travail, transparency and trust: A case study of computer-supported collaborative supply chain planning in high-tech electronics
H. Akkermans, P. Bogerd and J. van Doremalen
457 Pattern language: A framework for learning
A. Jessop

466 The management of the future. Ethics in OR: Respect, multicriteria management, happiness
J.-P. Brans
468 Operations research and ethics: Responsibility, sharing and cooperation
G. Gallo
477 Ethics outside, within, or beyond OR models?
M. Le Menestrel and L.N. Van Wassenhove
485 The importance of co-operation for ethical decision-making with OR
M. Theys and P.L. Kunsch
489 Equity in international greenhouse gases abatement scenarios: A multicriteria approach
K. Vaillancourt and J.-P. Waaub
506 A critical reflection on optimal decision
J.C.N. Clímaco
517 A framework for managing a portfolio of socially responsible investments
W. Hallerbach, H. Ning, A. Soppe and J. Spronk
531 EURO Young Scientists: Preface to the Feature Cluster on the First ORP^3 Conference
D. Bouyssou
534 Minimizing the makespan for the flow shop scheduling problem with availability constraints
R. Aggoune
544 Designing communication networks for distributed control agents
E. Camponogara and S. Talukdar
564 GRASP for set packing problems
X. Delorme, X. Gandibleux and J. Rodriguez
581 Batch scheduling in a two-machine flow shop with limited buffer and sequence independent setup times and removal times
M. Pranzo
593 A decision support system for a real vehicle routing problem
R. Ruiz, C. Maroto and J. Alcaraz
607 Robot trajectory planning with semi-infinite programming
A.I.F. Vaz, E.M.G.P. Fernandes and M.P.S.F. Gomes
618 Sixty years of Operational Research
K. Bowen
624 A simulation study of DEA and parametric frontier models in the presence of heteroscedasticity
R.D. Banker, H. Chang and W.W. Cooper
641 Congestion and returns to scale in data envelopment analysis
Q. Wei and H. Yan
661 Solving fuzzy transportation problems based on extension principle
S.-T. Liu and C. Kao
675 A general structure of achievement function for a goal programming model
C. Romero
687 Hierarchical coordination mechanisms within the supply chain
C. Schneeweiss and K. Zimmer
704 Object oriented modeling and decision support for supply chains
S. Biswas and Y. Narahari
724 The impact of information enrichment on the Bullwhip effect in supply chains: A control engineering perspective
J. Dejonckheere, S.M. Disney, M.R. Lambrecht and D.R. Towill
751 Selective discount for supplier–buyer coordination using common replenishment epochs
A.K. Mishra

757 Determining when to update the weights in combined forecasts for product demand—an application of the CUSUM technique
C.K. Chan, B.G. Kingsman and H. Wong
769 Customer lead time management when both demand and price are lead time sensitive
S. Ray and E.M. Jewkes
782 A new algorithm for the multi-item exponentially discounted optimal selection problem
I. David and O. Levi
790 Interval reliability of typical systems with partially known probabilities
L.V. Utkin
803 Contents Volume 153
